

Pattern Cut Laser Cut Wood Wall Filter Grilles

- Available in 26 patterns
- Sold in 3 unfinished veneers (oak, maple, or cherry)
- 50+ Sizes Available (custom sizes too)
- Wall or Ceiling Use Only
- Includes reusable filter for use
- Brass thumb screws hold cover door into place

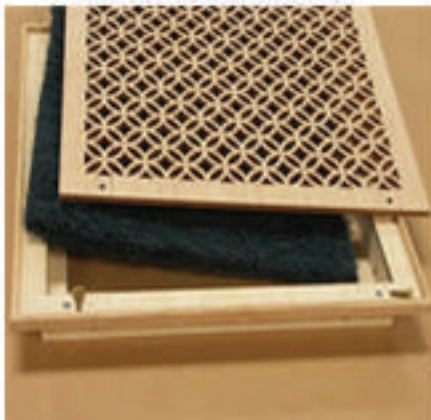

Wood Pattern Cut Filter Grille Installation Instructions:

Step 1) Remove existing filter grille (if applicable).

Step 2) Measure the wall or ceiling hole/opening (width x height)

Step 3) The custom build wood filter grille frame is made to fit your opening. It is shipped to you sanded, ready to paint or stain.

A reusable filter is included, or you can use your own.

Step 4) Paint or stain and install the filter frame into the wall opening.

Filter Frame Installation Close Up

Step 5) Install the filter

Step 6) Attach the grille cover with the included brass thumb screws

It is important to order by the actual opening in the wall/ceiling, because the filter frame is made to fit inside the opening.

The overall faceplate size of the filter grille unit will measure 2" larger
